MANAGED ENTERPRISE CLOUD SOLUTIONS

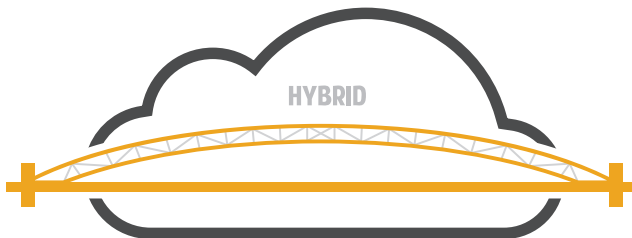

VPLS PRIVATE CLOUD

Built on top of VMware vCloud Powered services and robust hardware from Supermicro and Nimble Storage, VPLS delivers dedicated and guaranteed resources to customers over secure private point-to-point circuits or Internet VPN to any of our worldwide datacenters. VPLS Private Cloud services can include complete hardware and network isolation with single tenant configurations and an industry leading 99.99% Service Levels Agreement.

VPLS HYBRID CLOUD

VPLS's VMware Hybrid Cloud platform allows enterprises the flexibility and security they need to deliver resources to their end users and customers in minutes. VPLS Hybrid Cloud allows additional flexibility as resources can easily be scaled up and down or on a utility basis where you pay for only the amount you use. Once your business demands more of the Cloud, you can subscribe for a bigger package or upgrade your existing virtual machines with just a few clicks.

MANAGED ENTERPRISE BACKUP SOLUTIONS

⚙️ VIRTUAL AND PHYSICAL SERVER OPTIONS

Whether you run a completely virtualized environment or a mix of physical servers and virtual machines on any type of hypervisor we have backup solutions that enables you to store a copy of the backup on secure Cloud storage for offsite data protection that can improve your recovery time objective. Our backup solution offers block level based backups which can image an entire server and restore full images or individual files.

🔄 VEEAM CLOUD CONNECT

With Veeam Availability Suite v8 and later the need for VPN tunnels has been eliminated with Veeam Cloud Connect which delivers secure backups to the Cloud with AES 256 bit encryption in transit and at rest. Existing Veeam customers will be presented a Cloud repository to send backups to and have full visibility into the backup job status, storage quota used and even initiate restores. With WAN acceleration enabled customers can achieve up to 50x faster replication, and up to 20x reduction in bandwidth consumption.

🛡️ DISASTER RECOVERY AS A SERVICE

VPLS is your partner for Disaster Recovery as a Service (DRaaS). We incorporate various backup technologies coupled with our Cloud expertise to deliver a tailored solution to meet your RTO/RPO. Our consulting engineers will work with your team to discuss which applications are the most critical in ensuring the fastest recovery time and design a scalable and efficient Disaster Recovery solution.

🏗️ NIMBLE STORAGE REPLICATION AS A SERVICE

As a premier Nimble Storage partner, VPLS offers offsite replication services to the Cloud for enhanced data protection and Disaster Recovery solutions. VPLS Nimble Storage Replication Services to the Cloud are offered at our Los Angeles data centers to give you additional redundancy. Site to site VPN connections add enhanced data security.

ADDITIONAL SERVICES

SINGLE CABINET COLOCATION & PRIVATE CAGES

NETWORK IP TRANSIT & METRO ETHERNET

CUSTOM WEB SCRIPTING & PROGRAMMING

WEBSITE CREATION & MANAGEMENT

KRYPT

BARE-METAL DEDICATED SERVER

Dedicated bare metal servers are much more equipped to face and meet the growing demands of an expanding business, making them worthy investments and possibly one of the best decisions you ever make business-wise.

Having a dedicated bare metal server means having your own space in the web that you don't have to share with others. At one point, shared hosting may be convenient and less expensive, but once your business grows, it becomes more inconvenient and more expensive to move your existing server to a new one in order to accommodate the demands of your growing business. A dedicated server on the other hand, allows you more room for flexibility and scalability, making it a better and cost-effective option.

PUBLIC CLOUD POOLS - SELF-MANAGED

Krypt Cloud Pool allows virtual machines to be provisioned on demand where resources are managed by the customer based off of a large resource pool or Pay-Per-Use model. Cloud Pool resources are dedicated to the customer with tiered storage available from backup and archive grade Bronze storage to Platinum storage which includes cross site storage replication. Krypt Cloud Pool can be integrated into your existing VMware vSphere environment forming a Hybrid Cloud.

INSTANCE BASED CLOUD SERVERS

Our Cloud Server plans offer various compute / memory / storage / and bandwidth combinations with CPU, RAM, Storage Optimized plans to meet your computing needs.

BLAZING FAST STORAGE

Utilizing flash caching technology across all redundant SAN storage arrays with cross site replication.

MAXIMUM NETWORK SPEEDS

All cloud servers come with 1Gbps NICs connected through dual 10Gbps bonded NICs on all hypervisors.

DEPLOY KRYPT APPS

Instantly deploy a cloud server with your favorite apps such as Wordpress, Drupal, Joomla and more.

POWERED BY VMWARE

VMware is one of the most trusted names in true hypervisor virtualization & cloud computing technology.

FULLY SCALABLE & CUSTOMIZABLE

Customize your Cloud Pool with fully independent options for CPU, Memory, Hard Disk and Bandwidth.

SELF HEALING CLOUD SERVERS

All Cloud Servers are protected from host server failure with VMware High Availability and SAN protection.

VPLS SOLUTIONS

HARDWARE & SOFTWARE SOLUTIONS FOR TOP VENDORS LIKE AEROHIVE, BROCADE, FORTINET, NIMBLE STORAGE, PALO ALTO, SILVER PEAK, VEEAM, AND VMWARE

PROFESSIONAL SERVICES FOR INFRASTRUCTURE AND MIGRATION SERVICES ON-PREMISE AND TO THE CLOUD

VPLS Solutions' team of technology experts can help you with your most complex IT challenges. Our Professional Services practice leverages proven project management methodologies to deliver IT solutions that fit your needs and turn your technology infrastructure into a major competitive advantage. Our team holds numerous industry level certifications from Cisco, Brocade, Palo Alto, Fortinet, VMware and Microsoft.
